BANGLADESH CLINICAL LAB EXPO

Over the last decades, key health indicators such as life expectancy and coverage of immunization have improved notably, whilst infant mortality, maternal mortality and fertility rates have dropped significantly. Long before the emergence of contemporary global health initiatives, the government placed strong emphasis on the importance of childhood immunization as a key mechanism for reducing childhood mortality. Expanded Programme on Immunisation (EPI) in Bangladesh is considered to be a health system success because of its remarkable progress over the last two decades. It provides almost universal access to vaccination services, as measured by the percentage of children under 1 year of age who receive BCG (a vaccine against tuberculosis). This increased from 2% in 1985 to 99% in 2009. Coverage of other vaccines has also improved substantially.

Bangladesh's economy is projected to grow 7.5 per cent in fiscal year 2023-24 thanks to strong export growth and a rebound in domestic demand, the World Bank (WB) said in its Global Economic Prospects released. Dhaka and Chittagong are the principal financial centers of the country, being home to the Dhaka Stock Exchange and the Chittagong Stock Exchange. The financial sector of Bangladesh is the second largest in the subcontinent. Bangladesh is one of the world's fastest growing economy. The country has pursued export-oriented industrialization. It has also developed self-sufficient industries in pharmaceuticals, steel and food processing. Over the last 50 years since independence Bangladesh has made lot of strides in the Health Sector. Visibly there is proliferation in health infrastructures - medical colleges, medical university, private medical colleges, private clinics, private hospitals, district hospital, rural health centers and community clinics.

INDUSTRIES SECTOR RECORD BREAKING GDP GROWTH

Bangladesh govt.'s share of spend on healthcare is 37% of the total healthcare expenditure and this figure is expected to rise in the coming years. The Ministry of Health and Family Welfare has an extensive health infrastructure. The service delivery structure follows the country's administrative pattern, starting from the national to the district, upazila, union and finally to the ward levels.

In 2012, approximately 5,122 laboratories and other diagnostic centers were registered with the Ministry of Health and Family Welfare (MOHFW, 2012). In the private for-profit sector, there are some large diagnostic centers in the cities (Lab Aid, Ibn Sina, Popular and Medinova) providing laboratory and specialized radiological tests. Some of these facilities maintain a high standard. In the nonprofit private sector, there are centers like the International Centre for Diarrheal Diseases and Research, Bangladesh (ICDDR,B), which has a modern laboratory providing research facilities and extends laboratory services to the general community.

ABOUT THE EXPO

CEMS-Global USA's "7th Bangladesh Clinical Lab Expo", concurrently organized with "14th Meditex Bangladesh International Expo", was set to be the premier and most prestigious & exclusive International Exhibition devoted to focus on the ever-growing Clinical Lab sector of Bangladesh. This exhibition was a one-stop single platform to showcase from home and abroad the latest developments and emerging technology of the Industry. Being the only show of its kind in Bangladesh, the "7th Bangladesh Clinical Lab Expo" gave visitors a perfect platform to showcase new products or services to a vast audience, to introduce them and educate the attendees on what they had to offer.

ABOUT THE EXPO

This exhibition was very important for Bangladesh and its Clinical Lab Industry as a whole as it offered an Industry specific showcase of Experimental Product, Laboratory products, solutions and services from leading companies from across the globe. As the population growth rate is 1.01% and only Bangladesh contains 2.18% of the total population in the world which is more than 167 million people with the density of 1,112 people living per square kilometer seeking better medical services every day, therefore Bangladesh has big opportunities for various medical sectors healthcare companies and professional.

The “7th Bangladesh Clinical Lab Expo” was a great B2B platform and a meeting place for Buyers and sellers of Clinical Laboratory products, Healthcare products, solutions and services and also provided an interactive platform for Exhibitors to generate business through technology & machinery displays. The 7th Bangladesh Clinical Lab Expo significantly enhanced the synergy effect and attracted top level professionals from the Industry thus improving technology, focus and visitors
